

## Connexions Releases Predicted Delivery (PD) For Targeted Appraisal Forecasting

**July 06, 2020** – Connexions, an Appraisal Management platform that delivers best-in-class automation, reporting, data analytics and integration to real estate valuations, is excited to announce the release of our new Predicted Delivery (PD) feature.

As Connexions has always outperformed our competitors in innovation and service, our latest innovative feature is PD, designed to forecast the delivery date of an appraisal based on the appraiser matrix and predetermined turnaround times within a geographical region.

What does this mean for you?

You will now immediately be provided with an expectation of when the appraisal report will be completed, allowing you to set timelines and guidance around your clients' closings.

“Lenders, AMCs and Brokers choose Connexions to automate and gain better insights into their appraisal management process,” says Tom McCormick, President & CEO of Connexions. “We accomplish this by customizing Connexions to complement our client’s appraisal management workflows, providing comprehensive reporting capabilities and now PD adds an extra level of transparency by providing the average turnaround time for a location and appraisal product that results in better expectation setting.”

To find out how Connexions and the new Predicted Delivery feature can help you manage and gain better insight into your appraisal management process, contact Connexions at [Sales@GetCNX.com](mailto:Sales@GetCNX.com).

### About Connexions
